Overview

The SHAZ Micro ERP system is a fully-integrated ERP solution for Trading, manufacturing, Service Rendering, Construction and distribution organizations. Designed to facilitate industry best practices, SHAZ Micro ERP includes comprehensive software functionality to manage the enterprise's complete business operations.

The SHAZ Micro ERP system delivers fully-integrated sales order management, procurement, inventory management, warehouse management, financial management, asset management, customer relationship management, business intelligence, human resource management, payroll management, POS and manufacturing management software functionality in a single ERP system with both windows and web user interface. Furthermore, SHAZ Micro ERP's underlying architecture is flexible, customizable and configurable by design, enabling organizations to implement the system to meet their unique business process requirements.

Unlike many ERP systems, SHAZ Micro ERP is exclusively developed, sold, implemented, and supported directly by Sanisoft Information Technologies. This enables Sanisoft Information Technologies to deliver direct, unsurpassed ERP software solutions and services to its customers. Leading manufacturers and distributors select SHAZ Micro ERP to streamline business operations, increase bottom-line profitability, and gain a strategic competitive advantage. Discover SHAZ Micro ERP.
