ABOUT US!

Sanisoft Information Technologies was incorporated in Dubai with a vision to fill the void created by the lack of services provided by the business to their clients. We at Sanisoft are equipped with a professional workforce to deliver the most effective solutions for our clients. We strive to create total solutions for our utmost commitment towards our client's business interests.

Sanisoft grew to its present stature with the composite efforts of a team of software engineers, networks engineers, a charted accountants and management professionals who have vast experience in information technology and management consulting.

Our objective is to be a growing and profitable global company with the emphasis on latest technological trends in the field of Networking, Network Security and Software Solutions. Sanisoft provides End-to-end integrated business turnkey solutions across all computing environments, from host-based to client/server computing and the modern distributed software systems.

OUR VISION

We envisage, a reputed organization with framework of proficiency & ethical values in a challenging work environment to accomplish in achieving, quality growth & client satisfaction & to serve globally.

OUR MISSION

To achieve our mission, we have developed a set of goals:

- To be recognized and respected by customers worldwide, as a specialist supplier of LBS infrastructure & application technology
- Winning customers' recurring business through a combination of world-class end-to-end solutions, competitive prices, and most agile response to their needs

OUR VALUES

People: we value our people and continually strive to develop human resources with ongoing learning, we believe in integrity & retaining committed loyal workforce.

Commitment: to deliver projects within the time frame and after sales services with well-defined understanding of client's requirement has served us as the principal foundation of our long term satisfied cliental base.

Flexible adaptability: to provide convenient solutions, is the key factor that encourages our clients to return to Sanisoft for their valued projects.

OUR SERVICES

Sanisoft offers development of powerful, one-of-a-kind software intended to meet customers' unique demands. Sanisoft information technologies

OVERVIEW

The SHAZ Micro ERP system is a fully-integrated ERP solution for Trading, Manufacturing, Service Rendering, Construction, Transportation, Real-estate, Hospitality Management, Auditing and Distribution organizations.

Designed to facilitate industry best practices, SHAZ Micro ERP includes comprehensive software functionality to manage the enterprise's complete business operations. The SHAZ Micro ERP system delivers fully-integrated Procurement/Trading Management, Inventory Management, Finance, Asset management, Human Resource & Payroll Management, Customer Relationship Management, POS and Production Management modules in a single ERP system with both windows and web user interface.

Furthermore, SHAZ Micro ERP's underlying architecture is flexible, customizable and configurable by design, enabling organizations to implement the system to meet their unique business process requirements

Unlike many ERP systems, SHAZ Micro ERP is exclusively developed, sold, implemented, and supported directly by Sanisoft Information Technologies. This enables Sanisoft Information Technologies to deliver directly unsurpassed ERP software solutions and services to its customers. Leading manufacturers and distributors select SHAZ Micro ERP to streamline business operations, increase bottom-line profitability, and gain a strategic competitive advantage.

System implements the four-tired Role Based security which continually monitors and controls the user actions based on the permissions he/she enjoys.

OVERVIEW

SHAZ HR & Payroll System is a web-based enterprise solution which is mainly aimed to automate all tasks, activities and computations of an organization's Human Resource and Payroll Management process. System is featured with a robust data structure to store and manage the all information about business entities and processes like employees and salary calculation. System is equipped with a comprehensive real-time document management system to archive and manage all documents in electronic folders, related to company and employees moving in, out or within an organization. SHAZ Hr & Payroll system is having a real-time watcher service to track the upcoming expiries of data and documents of company and employees to prompt and dispatch the reminders and alert to responsible entities. The main modules and functionalities are briefly described hare

SLC

(Secretarial, Legal & Compliance System)

- Company's Data Archive
- Management Details
- Financial Information
- Constitutional & Legal Detail
- Compliance
- Company's Document Archiving
- Alert Messaging System about Data & Document Validity
- Multilingual User Interface
- Security & Reports

SanisSoft
information technologies

OVERVIEW

SLC System is a corporate application developed and supported by Sanisoft Information Technologies. This System allows its users to access and manage all the secretarial, legal and compliance data through a web interface.It attempts to gather a specific set of documents moving in and out of the corporate environment in a central intelligent repository. This system provides necessary support for keeping the documents up-to-date, like sending alert messages to responsible personnel. The client's secretarial, legal and compliance (These constitute the acronym SLC) related documents will be saved in the system with their corresponding document activity dates. SLC System performs a nightly walkthrough in the repository to discover any nearing activity dates. If it discovers any, it alerts all the responsible personnel about the occurrence of the situation through email. The system is supposed to drag attention of secretarial, legal and compliance personnel to an upcoming event (Ex: Expiration of contract) and thereby helping them to take necessary actions.
